PROFESSIONAL SUMMARY

Full-Stack Web Developer with a 7+ year foundation as a Senior IT System Engineer in enterprise-scale IT infrastructure. Building web applications with Next.js, React, and Golang, combining backend, database, and system security understanding — including hands-on experience managing a Hardware Security Module (HSM Payshield) and leading infrastructure migrations that improved server uptime by 15%. This combination gives me a well-rounded perspective for designing applications that are secure, scalable, and production-ready.

SELECTED PROJECTS

Nota POS (*Next.js, Golang, SQL Server*) — Multi-role point-of-sale system (Cashier, PPIC, Finance, Admin) with QRIS & EDC payment integration and ESC/POS thermal receipt printing. (2023–present)

TDS – EDC SN Data Cleaner (*Python, Pandas, JavaScript*) — Data cleaning & standardization tool for 60,000+ EDC Serial Number records, used daily by the operations team with no coding required. (2023)

Web Project Management Dashboard (*Next.js, Golang, SQL Server*) — Multi-module project management dashboard, including an architecture migration from Vite to the Next.js App Router for better performance. (2024)

daytodelist (*Next.js 16, React 19, JWT Auth*) — Task management app with user authentication and Excel report export, built to deepen my skills in server actions & modern auth patterns. (2024–present)

WORK EXPERIENCE

Technical foundation before fully focusing on web development — PT Primavista Solusi, 7+ years of internal career growth:

Senior System Engineer

2024 – Present

- Led legacy infrastructure migration to a safer, more scalable environment; built a monitoring system (Grafana/Prometheus) that improved server uptime by 15%.
- Managed and secured a Hardware Security Module (HSM Payshield) for payment transactions in line with industry security standards.
- Served as cross-team technical lead, designing IT compliance standards and accelerating critical incident resolution.

Staff System Engineer

2021 – 2024

- Installed, configured, and maintained IT infrastructure (Windows Server, Linux/Ubuntu); performed advanced troubleshooting as the primary escalation point.
- Collaborated cross-functionally to design improvements that increased infrastructure reliability and efficiency.

Admin Preparation — EDC Device Operations

2018 – 2021

- Performed physical & functional QC on EDC machines, software installation, security key injection, and banking network configuration — the early foundation of my payment security expertise.
- Handled stock opname, device log management, and coordinated distribution with regional admin teams.

TECHNICAL SKILLS

Web Development: JavaScript, React, Next.js, Tailwind CSS, HTML5/CSS3, JWT Auth

Backend & Database: Golang, SQL Server, REST API Design

Data & Automation: Python, Pandas

Infrastructure & Security: Linux/Windows Server, AWS/Azure, HSM Payshield, Grafana/Prometheus, NGINX, IT Compliance Standards

EDUCATION & LANGUAGES

Bachelor's Degree in Information Systems (S1) — Institut Informatika dan Bisnis Darmajaya

Languages: Indonesian (Native), English (Intermediate)
