PROFESSIONAL SUMMARY

Data Analyst with Frontend Development capabilities, backed by a 7+ year foundation as a Senior IT System Engineer in enterprise-scale IT infrastructure. Working with data using SQL, Excel, and Power BI/Tableau, and building the dashboards and interfaces myself with React & Next.js — including hands-on experience managing a Hardware Security Module (HSM Payshield) and leading infrastructure migrations that improved server uptime by 15%. This combination gives me a well-rounded perspective for turning data into insights that are ready to act on.

SELECTED PROJECTS

- Analytics Dashboard** (*JavaScript, SVG*) — **Prototype multi-branch analytics dashboard: KPIs, sales trends, target vs. actual, and an interactive Indonesia map with zoom/pan; built 100% with vanilla JavaScript/CSS/SVG. (2026)**
- GreenPos** (*React Native, Next.js, Golang*) — **A rebrand and continued evolution of Nota POS: a 4-role mobile cashier system (Cashier, PPIC, Finance, Admin), a separate web backoffice, QRIS & EDC payment integration. (2023-present)**
- TDS – EDC SN Data Cleaner** (*Python, Pandas, JavaScript*) — Data cleaning & standardization tool for 60,000+ EDC Serial Number records, used daily by the operations team with no coding required. (2023)
- Web Project Management Dashboard** (*Next.js, Golang, SQL Server*) — Multi-module project management dashboard, including an architecture migration from Vite to the Next.js App Router for better performance. (2024)
- daytodelist** (*Next.js 16, React 19, JWT Auth*) — Task management app with user authentication and Excel report export, built to deepen my skills in server actions & modern auth patterns. (2024–present)

WORK EXPERIENCE

Technical foundation before fully focusing on web development — PT Primavista Solusi, 7+ years of internal career growth:

- Senior System Engineer** 2024 – Present
- Led legacy infrastructure migration to a safer, more scalable environment; built a monitoring system (Grafana/Prometheus) that improved server uptime by 15%.
 - Managed and secured a Hardware Security Module (HSM Payshield) for payment transactions in line with industry security standards.
 - Served as cross-team technical lead, designing IT compliance standards and accelerating critical incident resolution.
- Staff System Engineer** 2021 – 2024
- Installed, configured, and maintained IT infrastructure (Windows Server, Linux/Ubuntu); performed advanced troubleshooting as the primary escalation point.
 - Collaborated cross-functionally to design improvements that increased infrastructure reliability and efficiency.
- Admin Preparation — EDC Device Operations** 2018 – 2021
- Performed physical & functional QC on EDC machines, software installation, security key injection, and banking network configuration — the early foundation of my payment security expertise.
 - Handled stock opname, device log management, and coordinated distribution with regional admin teams.
- Data Analysis: SQL, Excel, Power BI/Tableau, Statistics, Dashboarding, Python, Pandas**
- Web Development: JavaScript, React, Next.js, Tailwind CSS, HTML5/CSS3, JWT Auth**
- Backend & Database: Golang, SQL Server, REST API Design**
- Infrastructure & Security: Linux/Windows Server, AWS/Azure, HSM Payshield, Grafana/Prometheus, NGINX, IT Compliance Standards**

EDUCATION & LANGUAGES

Bachelor's Degree in Information Systems (S1) — Institut Informatika dan Bisnis Darmajaya
Languages: Indonesian (Native), English (Intermediate)
